Summary

With over 2 years of experience in software development and testing, I have a strong foundation in ReactJs and MySQL. Currently, I'm honing my problem-solving skills through Scaler Academy. I hold cloud certifications from AWS and Azure, bringing expertise in cloud technologies. Additionally, I possess knowledge of CRM systems like Salesforce. I'm enthusiastic about joining a dynamic team and contributing my skills to drive company success.

- Web Development

Experience

PwC

July 2022 – Oct 2023

Associate 2

Remote

- I was part of a collaborative team effort focused on developing a healthcare domain portal.
- Developed a dedicated portal tailored to the needs of group insurance brokers, streamlining their interactions with the system.
- Implemented end-to-end business flows, including quoting, enrollment, and contract renewal, providing a holistic platform for managing insurance operations.
- Designed the portal to accommodate three distinct group types: Small Groups, Large Groups, and Family and Individual policies, ensuring flexibility and customization.
- Created robust maintenance flows, enabling quick and secure modification of various records, ensuring data accuracy and compliance with changing requirements.

Apr 2021 – July 2022

Associate

Remote

- Developed test strategies that covered all test scenarios which helped save testing efforts by 40 per cent.
- Logged more than 1,000 critical and severe defects in a project in Salesforce practice that helped the product run smoothly in all stages of SDLC.
- Developed quality in working in experience cloud in the Healthcare domain.
- Helped in debugging and logging defects in HTTP requests which helped product efficiency increase by 30 per cent.
- Created test plan templates for practice level and helped team members in training activities.

Projects

Portfolio Website for UI/UX Engineer (front - end)

August 2023

- Developed interactive web pages to engage users, providing a dynamic and immersive experience.
- Engineered smooth and animated transitions between pages, enhancing the overall navigation and user journey.
- Utilized Framer-motion and JavaScript animations to bring the text to life, making content more captivating and memorable for visitors.
- Implemented a responsive, mobile-first approach to ensure a seamless user experience on various devices, from desktop to mobile.
- Enhanced user experience by adding a Dark Mode feature, allowing users to choose their preferred theme for improved readability and comfort.
- Achieved a remarkable 80% PageSpeed and YSlow score, ensuring fast loading times and a smooth browsing experience. Additionally, the website adhered to SEO best practices, with a 90% score in SEO metrics and a perfect 100% score in web development best practices.
- **Tech Stack used: React, Framer-motion, Tailwind CSS**

Authorization using Next-Auth (back - end)

May 2023

- Implemented secure and user-friendly login and signup authentication by seamlessly integrating Google Service Provider, ensuring user data protection and a smooth onboarding process.
- Leveraged the power of next-auth for robust and efficient authentication, enhancing security and providing a hassle-free login experience for users.
- Implemented React Hot Toast for real-time user feedback, notifying users with dynamic toast messages on successful login and signup, as well as providing informative messages in the event of failed authentication, ensuring a positive and informed user experience.
- **Tech Stack used:** NextJS, Google Service Provider, Next-Auth, React-hot-toast
